PROFESSIONAL SUMMARY

Final-year Computer Science undergraduate (Class of 2027) with hands-on experience building AI-powered, full-stack applications using React, Node.js/Express, and SQL/MongoDB databases. Skilled in prompt engineering and multi-agent orchestration with LLMs (Groq LLaMA 3.3 70B, Mistral) to accelerate development and automate real-world workflows. Strong foundation in Python, Java, REST APIs, and Git-based version control, with a proven hackathon track record delivering production-grade prototypes under tight deadlines. Eager to bring AI-assisted engineering practices to real-world InsurTech products.

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, Python, SQL

AI / LLM Engineering: Prompt Engineering, Multi-Agent Orchestration, Groq LLaMA 3.3 70B, Mistral, Retrieval-Augmented Generation (RAG), scikit-learn

Frontend Development: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Vite

Backend Development: Node.js, Express.js, FastAPI, Flask, REST API Design

Databases: MongoDB, MySQL, SQL, Firebase

Tools & Version Control: Git, GitHub, VS Code, Postman, Firebase, Netlify, EmailJS

PROJECTS

ALLYVEX – AI Sales Intelligence Engine

Python, FastAPI, React, Groq LLaMA, Mistral, Server-Sent Events (SSE)

- Architected a multi-agent debate system (Bull, Bear, Detective, and Orchestrator agents) using prompt engineering with Groq LLaMA 3.3 70B and Mistral to research companies and generate customer-vs-partner sales verdicts with confidence scores and automated outreach emails.
- Implemented real-time SSE streaming and scale-adaptive evaluation logic to support both startup and enterprise use cases.

AI-Based Project Failure Analysis System

FastAPI, React, MongoDB, Retrieval-Augmented Generation (RAG)

- Developed a secure RAG-based platform that classifies project reports as Passed or Failed and generates evidence-based root cause analysis reports.
- Designed a chunked document ingestion pipeline with vector search to retrieve only relevant sections, reducing context usage while improving analysis accuracy.

Silent Emergency Communication System (Freelance Project)

Python, FastAPI, React, OpenCV

- Engineered a production-grade AI platform that detects emergency hand gestures via OpenCV and instantly triggers SMS, email, and dashboard alerts.
- Designed a scalable FastAPI backend with low-latency notification pipelines and a real-time React monitoring dashboard.

CERTIFICATIONS

- Intro to Industry 4.0 & Industrial IoT (Elite)**
NPTEL / IIT Kharagpur | 82% (4 SWAYAM Credits) | Jan–Apr 2026
- Project Management 101**
Simplilearn SkillUp | Verified Certificate #10122392 | Apr 2026

EDUCATION

- B.E. in Computer Science and Engineering**
St Joseph Engineering College, Mangaluru | CGPA: 8.53 / 10 | 2023–2027
- Pre-University (Science)**
Vivekananda PU College, Puttur | 91.5% | 2021–2023
- SSLC**
Priyadarshini English Medium School, Bettampady | 91.2% | 2011–2021

Open to internships, full-time roles, and hackathon collaborations. Certificates available on request.
